Please remember our veg for your veg bags is harvested and packed fresh on day of delivery. This is something that is done with our co-workers and part of their training is to follow a set procedure regarding what size of bag is required and to how much of each product is given. Our co-workers then weigh out the relevant amount of each veg and place in the bag. They then have a checklist to follow every week which allows them to tick the different veg that you receive. This is the reason we cannot take orders for individual quantities as this will create confusion.

Please note we do not use any pesticides or chemicals and plants may be a little nibbled by slugs, etc. Also, as the veg will be fresh from the garden, we will try to brush off as much of the soil as possible, but these vegetables will not be as pristine as you would get in a supermarket - if this is what you are expecting then our veg bag is not for you. **Please ensure you wash all veg/fruit prior to eating.**

**Allergens - please note we do grow Celery and Celeriac in the garden, although care has been taken, we cannot guarantee that these veg have been separated from other veg growing in the beds.**

We hope you will enjoy our service and understand the hard work put in by our co-workers. Please email or return this form to [joanne.brown@theseedbox.org.uk](mailto:joanne.brown@theseedbox.org.uk)
